NEW YORK, Nov. 10.-The largest bond sale ever attempted by the city of New York has met with success.

Bids were opened yesterday evening in the comparoller's office for the \$16,-046,590,70 of bonds recently advertised by the controller, and the large number of bidders, the prices offered and the ag gregate amount of all the bids received, assure the sale of all the bonds at fignres that will give the day a fair premium on the lot.

times the amount of the bends and among them was one for the entire issue at 104.71. Nearly every prominent sue at 104.11. Nearly every prominent bank in Wall street was represented, as well as several syndicates of bankers. But the list was chiefly remarkable for the large number of private individuals who were heard from. These were residents not only of this city and its vicinity, but of many parts of the country, and their bids in many instances ranged above those of the bankers, showing that they had taken their gold out of their hoarding places and were looking for prime investments.

Elizable Central Gold Coming In. WASHINGTON, Nov. 10 .- The trensary, for the first time in several years, is receiving gold in considerable quantities for custom duties. From this reason and the further fact previously mentioned in these dispatches, that gold is being withdrawn from hearding places and deposited in the various sub-treasuries, the gold balance at the close of business today had increased to \$122,754,515. The present policy of the department is to discourage the receipt of gold, as the treasury has not on hand, without inconveniencing itself, sufficient currency to exchange for all the gold likely to be offered. The present treasury balance is \$225,805,000, of which (exclusive of the \$122,000,000 gold) \$18,853,000 is in greenbacks and \$39,471,000 in Sherman notes. Only \$13,343,000 in silver certificates remain in the treasury. The continued increase in the deficit is now engaging the attention of Secretary Cartisle and will be treated by him in his annual report. It is supposed that he will recommend an increase in the tax on beer from \$15,000. rt Line & U. N. an increase in the tax on beer from \$1 to \$2 per barrel. This proposition is said to be favored by Commissioner

The former of the mission of the mission and present is \$4,85,000, making an appropriate since July 1, 1895, of \$37,442,600.

Why a Receiver For the Santa Fe Was Demanded.

SCHEME TO BEAR STOCKS

MEN WHO STOOD IN EXPECTED TO MAKE MONEY.

The Deal Was Nipped In the Bud, However, and Those Who Invested In It Lost Henvily-A Very Interesting Railroad Story.

TOPEKA, Nov. 10 .- The true inwardse of the recent application and ap-intment of a receiver for the Atchison. Tereka & Santa Fe railway in the distriot court of Jefferson has leaked out. Since the order of Judge Foster of the federal court was issued restraining the receiver from taking control and removing the case from the state courts and the publication of the further fact that the alieged law under which the proceedings were instituted was never passed by the legislature but was printed in the statutes by error, virtually rendering all proceedings void, has caused some of those connected with the case to talk. From them it is learned that the suit was from its incertion a scheme to bear the stocks and bonds of the company and make a lot of money for the men who stood in with the "play." A few days before the suit was bean in Oskaloosa, several bankers of leaferson country went to Checago and another to St. Louis where they are said to have sold heavily of Santa Fe sociariles went up and when it was telegraphed broadcast that a receiver had been amounted in Kansas for the ratical exponent, in Kansas for the ratical exponent, in Kansas for the ratical with the "play" out here in Kansas had no effect whatever. Instead of making money the bankers and others who invested in the scheme lost heavily. This is the story of the deal A Kansas City man of innancial worth and of undoubted standing in that city declares that a few days before the aution was brought at Oskaloosa a well-known insurance and speculative lawyer of Topeka called on him at Kansas City man of the proposition that he go in with certain Topeka, Oskaloosa and Holton men and make \$1,00,00. By the terms of the proposition that he go in with certain topeka calloss and Holton men and make \$1,00,00. By the terms of the knass City capitalist should be convinced beyond doubt that he would be conventing the convention of th triot court of Jefferson has leaked out. Since the order of Judge Foster of the steady. Native steers, best, 4.15@4.86, fair to good, 3.15@4.15; cows and helfers, best, 2.75@3.20; fair to good, 1.65@2.75; bulls, 1.75@2.50; stockers and feeders, 2.50@3.85; calves, 5.00@3.00.

It is not improbable that the receivership case may be summarily dismissed
within a few days by Attornsy-General
Sewes of Kansas. It is known that he
does not consider it well founded in law
and is not in sympathy with its prosecution. When questioned by the United
Associated Presses representative today
he said: "I have not yet investigated
the case to my own satisfaction. If,
after thorough investigation I find the
case has merits I will prosecute it, bet,
if I find the law is not, sufficient. If I
find the bringing of the suit was a great
conspiracy to line the pockets of a few
men at the expense of the Santa Fe road
and the state, then this suit will come
to a sudden end."

### FOR RECIPROCITY

Propositions Will Be Made to President McKinley.

MUCH INTEREST

IS BEING TAKEN

RENEWAL OF THE TREATY OF 1854

Phat Was Said to Be Favorable to the Interests of Both Countries, and a Gentleman of Experience. Thinks It Would lie a Good Thing Today-Active Work Will Soon Be Commenced.

be sent to washington shortly after alckinley's inauguration to negotiate a reciprocity treaty, creates much interest
among the business men of this city.
The subject has now become a itney
tople of discussion. Hugh McLennan,
s prominent grain merchant whose four
business experience extends back to the
fifties and sixtles, when a reciprocity
treaty was in force, said today.
"I am in favor of the renewal of the
trecty of 1851, if it is possible to secure
that, and I want to include privileges for
both nations of coast and inland waters.
I want it made possible for Canadian
vessels to carry cargoes from one American port to another, and the same priviiese to be extended to American vessels.
The treaty of 1854 was certainly favorrable to the two countries, and I do not
believe the conditions of today would
make any difference. If a new treaty is
negotiated, it should be as much as posrishe a repetition of the treaty of 1854,
with the additions I have spoken of regarding navigation. It would certainly
be to the advantage of Canada to have
reciprocity in natural products. It is
a mistake to think that the war made
hav great difference at the time the
treaty was in force. The treaty did not
favor any particular part of Canada, but
all points were benefited by the trade it
brought on. As a matter of fact, the
centers of trade will not realize the benefite so much as the country districts
would do. The advantage is certainly
for the farmers. The only objections
witch would be those raised as far as
manufacturing would be concerned. We
can safely let the Americans do that
Give us a reciprocity treaty in natural
products with better coasting laws and
free canals, and we'll be satisfied."

ADDRESS BY REV. GUNBERG

"LUTHER'S LIFE AND THE REF ORMATION" HIS THEME.

Rev. P. E. Asley Speaks on "The Reformation in Sweden"-The Services Held at the Swedish Latheran Church.

Fourth East street, a reformation service, in commemoration of the four

hundred and thirteenth anniversary of the birth of Martin Luther, was held last night. This being the only commemorative service held, the attendance was large. Rev. A. N. Gunberg of Provo lectured on "Luther's Life and Reformation," and P. E. Asley, the pas-Reformation," and P. E. Asley, the pastor, spoke on "The Reformation in Sweden." Mr. Gunberg said in part:
Martin Luther was born in Elsiaben. Germany, in the year 1483. He received a very thorough classical education, and entered a monastery at Wittenberg at the age of 27. While there, he happened to find the Holy Bible locked up in the library. He studied it thoroughly and soon saw the many indulgences practiced in the Bible locked up in the library. He studied it thoroughly and soon saw the many indulgences practiced in the Catholic church. He at once started a tirade against this abuse of the word and commandments of God, and the Catholic priesthood became so frightened that the pope of Rome was sought for advice on the matter. An ambassador was sent to Luther, to quiet his abuse against the mother church, but only succeeded partly. At last the church rose up against him. Charles V, the emperor of Germany at that time, called a great council at Worms, to prepare the preliminarles of crushing the uprising. This council did no good, however, as Luther still kept to the Bible, and denounced the bylaws of the Catholic church as sacrilegious in some forms. For this, he, with a few of his followers, was banished from the church. The first thing the great reformer did after his banishment was to translate the Bible from the Latin to the German tongue. This was one of the reasons of the success of the reformation. This great man started several schools throughout Germany, in which the Bible was taught, and published several books for the scholars and teachers. Several councils many, in which the Bible was taught, and published several books for the scholars and teachers. Several councils between the emperor of Germany, the pope and the Catholic priesthood, were held in 1830 to form plans to counteract the influence of the schools, but all to no avail. The Protestants, as the followers of Luther were called, had formed a confessional, founded on the Scripture. A new church was organized under this banner, composed of the fol-

Peter.

The first step of the reformation was brought about by the "ricksdag" or congress of Sweden. In some respects the political condition of the country necessitated a freedom from papal rule, and thus helped to bring about the rebellion in the church, but Olaus Peter was no doubt the genesis of the movement. Together with King Gustave, he formed a new system of government in Sweden, that was entirely free of any church rule.

Several attempts were made by the Catholic church to keep down the movement, but in the year 1593, the whole Lutheran confessional was adopted as one of the principles in the government of Sweden.

The danger is in letting the people forget the silver issue, and two years and four months hence, having to begin again with the A B C of the financial question. Permanent prosperity under the gold standard is impossible. There may be a little spurt (probably there will be), based upon artificially caying "confidence," but it cannot

### AMUSEMENTS.

LA LOIE:-There was a big audience at the theatre last evening, and probably 90 per cent of it went out of the ably 30 per cent of it went out of the doors cogitating on whether or not it your success.

which has been doing a good business in San Francisco, puts in a full week at the Lyceum, opening next Monday night. The advance sale opens tomorrow. P. J. Kennedy, manager of the company, is now in the city.

Sold in all parts of the world.

DAYNES RECITAL:—The lower portion of the tabernacie was well filled by a very appreciative audience last evening; the occasion was the piano and pipe organ recital by the pupils of Professor Daynes, organist of the tabernacie. The occasion was mainly interesting as showing the marked progress made in the manipulation of the great instrument by such well known pupils of the professor as Mr. J. F. Griggs, Mrs. Kate Romney Stewart, Miss Edna Coray and Mrs. Crissie Lawson. All were generously applanded. Other pupils rendered ambitious selections on the plano, and all reflected credit on themselves and their teacher. Miss Mary Romney and Mr. Goddard, the vocalists, did excelient work and were heartily applanded.

Near Perrinton, Michigan. PERRINTON, Mich., Nov. 10.—The rest-Perittination, Mich., Nov. 10.—The rest-dence of Alexander Campbell, a farmer ilving four miles south of this place, was destroyed by fire early this morning, and three persons were burned to death. The building was a frame one, and the flames had gashed great headway before the family was aroused. Mr. and Mrs. Camp-bell and one child escaped, but two other children, aged 2 and 6 years, and a cousin aged 18, were burned to death.

## LETTER FROM BARTINE.

BURNED TO DEATH.

Three Persons Meet a Horrible Fate

At the Swedish Lutheran church, on BE DECLARES THAT BIMETALLISTS ARE NOT DISCOURAGED.

> Reasons That Contributed to the Success of McKinley-The Vote of Workingmen Controlled by Fenr of Factories Being Closed Down.

Hon. R. C. Chambers has received he following interesting letter from Hon. H. F. Bartine, editor of the Na-

tional Bimetallist: Chicago, Ill., Nov. 8, 1896,

My Dear Mr. Chambers:

My Dear Mr. Chambers:

Our calculations failed and McKinley is elected. It is not, though, in any
sense a "landslide." Thirty thousand
more votes our way in Indiana, Kentucky, California, Oregon and the Dakotas would have elected Mr. Bryan,
In fact, McKinley had a close call. I
attach no importance to his large vote
in New York, Massachuseits, Pennsylvania and Illinois, which accounts for
his immense majority in the popular
vote. In the great cities of those states
the wage-workers were voted in solid
blocks by their employers. They were
told in so many words that if McKinley were elected they would have ley were elected they would have work; if not, it was altogether uncer-tain. Few men working for wages have the strength and independence to rethe strength and independence to re-sist such an argument (?) as that In Ohlo, Michigan and Minnesota it will be found that it was the employees of the great industrial plants, mainly in

Ohlo, Michigan and Minnesota it will be found that it was the employees of the great industrial plants, mainly in the large cities, who turned the scale against us. The vote of the farmers, while not what we had reason to expect, was at least healthy and honest.

When we consider the odds against us, while disappointed, of course, we still have reason to be proud of the contest which we made. With the great "money power" solid for McKinley, controlling as it did the press, the manufacturing and commercial classes, and through them millions of votes, the fact that McKinley so narrowly escaped defeat is nothing less than marvellous. The defection of the gold Democrats, insignificant at it appeared. scripture. A new church was organized under this banner, composed of the followers of the reformer. Besides preaching and teaching against he church of Rome, Luther wrote and published many sacred books, the greatest of which, was the translation of the Bible from the Latin to the German.

Luther was a poet, composer, and doctor of philosophy and theology. He traveled a great deal in Germany and littly, visiting Rome several times.

He died in the year 1546, at his birthplace, Eislaben, Germany, at the age of 62.

The Lutheran church now contains about 50,000,000 members, and has the Bible and confessional as its cornerstone.

Rev. P. E. Aslev said that the reformation in Sweden had its origin in a disciple of Luther, named Claus Peter.

The first step of the reformation was brought about by the "ficksdag" or congress of Sweden. In some respects the political condition of the country first was alone enough to defect us. In some of the close states their votes would have changed the result, and in all the moral effect of their revolt was very great. It entirely accounts for the states, for the most of them, or at least many of them, were large employers of labor. Their money and their personal influence were withdrawn from our side and thrown to the other.

But, notwithstanding the defeat, I have vet to see the silver man who is discouraged. Here they are more determined than ever. They know that in the last analysis it was lack of education among the wage-workers and farmers that defeated them. To educate 72000,000 of people upon such a question is no small undertaking. Practically all that was done so far as the masses are concerned was accomplished within the last six or eight months. There had been a scattering fire kept up for years, and an organization of the close states their votes would have close states their organization in some of the close states their votes would have close states their votes would have close states their and in the moral effect of them, or at least many of them, were large employe

there will be), based upon artificially evived "confidence," but it cannot last, and when the reaction comes, we should be in a position to offer genuine bimetallism as a sure road to permanent relief. But if we entirely abandon the field now, this will be difficult, for the most of people have short memories.

sincerely yours, H. F. BARTINE.
